Conventions used in Repertorium Plantarum Succulentarum

- Repertorium Plantarum Succulentarum attempts to list, under separate headings, newly published names of succulent plants and relevant literature on the systematics of these plants, on an annual basis. New names noted after the issue for the relevant year has gone to press are included in later issues. Specialist periodical literature is scanned in full (as available at the libraries at ZSS and Z or received by the compiler). Also included is information supplied to the compiler direct. It is urgently requested that any reprints of papers not published in readily available botanical literature be sent to the compiler.
- Validly published names are given in **bold face** type, accompanied by an indication of the nomenclatural type (name or specimen dependent on rank), followed by the herbarium acronyms of the herbaria where the holotype and possible isotypes are said to be deposited (first acronym for holotype), according to Index Herbariorum, ed. 8 and supplements as published in Taxon. Invalid, illegitimate, or incorrect names are given in *italic* type face. In either case a full bibliographic reference is given. For new combinations, the basionym is also listed. For invalid, illegitimate or incorrect names, the articles of the ICBN which have been contravened are indicated in brackets (note that the numbering of some regularly cited articles has changed in the Tokyo (1994) edition of ICBN).
- The compiler would like to point out that he does not accept any names that might be inadvertently validated in this volume of RPS.
- Bibliographic details of papers dealing only with the description of one or two new taxa are not repeated in the bibliographic section.
- Abbreviations for periodicals are those suggested in 'A Bibliography of Succulent Plant Periodicals' (U. Eggli in Bradleya 3: 103-119, 1985, and supplements in l.c. 5: 101-104, 1987) for specialized periodicals, or those of Bibliographia Periodicorum Huntianum (including Supplement) for most other periodicals.

Konventionen im Zusammenhang mit dem Repertorium Plantarum Succulentarum

- Das Repertorium Plantarum Succulentarum ist eine jährlich herausgegebene Zusammenstellung neuer Namen für sukkulente Pflanzen und der relevanten systematischen Literatur. Neue Namen, die nach der Drucklegung der Ausgabe des betreffenden Jahres bekannt werden, erscheinen in der nächsten erreichbaren Ausgabe. Spezialisierte Zeitschriften werden umfassend durchgesehen, soweit sie in den Bibliotheken von Z und ZSS vorhanden sind oder dem Herausgeber privat vorliegen. Der Herausgeber bittet alle Autoren dringend, Separata relevanter Publikationen zur Verfügung zu stellen, vor allem wenn es sich um Beiträge in schwer zugänglichen Serien handelt.
- Gültig veröffentlichte Namen werden in **Fettschrift** wiedergegeben unter Angabe des nomenklatorischen Typs (Name oder Belegexemplar je nach Rangstufe; gefolgt von den Herbarabkürzungen [entsprechend Index Herbariorum, ed. 8, und in Taxon publizierten Supplementen] der publizierten Hinterlegungsorte für Holotyp [1. Abkürzung] und Isotypen). Ungültige, illegitime oder falsch angewandte Namen erscheinen in *Kursivschrift* unter Angabe (in Klammer) derjenigen Artikel des ICBN, die verletzt worden sind. In allen Fällen folgen die kompletten bibliographischen Angaben. Für Umkombinationen wird auch das Basionym angegeben. Dabei ist zu beachten, dass die Nummerierung einiger häufig zitierter Artikel mit dem Erscheinen der Tokyo-Version (1994) des ICBN geändert hat.
- Der Herausgeber weist mit aller Deutlichkeit darauf hin, dass er keinen Namen anerkennt, der zufälligerweise in dieser Ausgabe des RPS validiert worden sein könnte.
- Beiträge, welche nur Beschreibungen eines oder zweier Taxa enthalten, werden in der bibliographischen Liste nicht separat aufgeführt.
- Die Abkürzungen für spezialisierte Sukkulente-Zeitschriften richten sich nach 'A Bibliography of Succulent Plant Periodicals' (U. Eggli in Bradleya 3: 103-119, 1985, sowie Supplementen in l.c. 5: 101-104, 1987), für allgemeine botanische Zeitschriften in der Regel nach Bibliographia Periodicorum Huntianum und Supplement.

Preface

This issue of RPS is the first which was produced with the help of the library at the Desert Botanic Garden Phoenix, USA. Library staff at the DBG in Phoenix has been able to supply important literature reference from scanning on-line databases available to them, and this service has been of great importance to insure as complete coverage of the relevant literature as possible. Thank you.

From RPS 47 onwards, RBG Kew will again significantly assist in the compilation. I am very grateful that Dr. Daniela Zappi has accepted to become Assistant Editor of RPS.

On a more personal matter the undersigned would like to apologize to all RPS readers who had ordered a copy of the "Bibliography of Succulent Plant Periodicals", announced on the back cover of the last issue. Unfortunately, the Czech publisher has been unable to produce this bibliography in time but has assured that it will become available this autumn. Please accept my sincere apologies for the delay, but reasons beyond my influence have been responsible.

Urs Egli

Acknowledgments

As in previous years, Reto Nyffeler (Zürich) and Joachim Thiede (Köln) have been of invaluable help in locating and supplying important literature, and this help is kindly acknowledged. A word of thanks goes to Nigel Taylor (Kew) who dealt with several nomenclatural problems despite the burden created by his new job in Kew.

Vorwort

Diese RPS-Ausgabe ist die erste, die mit der Hilfe der Bibliothek am Desert Botanic Garden Phoenix, USA, produziert wurde. Bibliotheksmitarbeiter am DBG in Phoenix haben zahlreiche wichtige Literaturhinweise beigetragen, die sie durch Konsultation der ihnen zugänglichen on-line-Datenbanken zusammentrugen. Für diese Hilfe bin ich sehr dankbar.

Ab RPS 47 werden die RBG Kew erfreulicherweise unsere Arbeit wieder massgeblich unterstützen. Ich bin sehr dankbar, dass Dr. Daniela Zappi das Amt als Assistant Editor für das RPS übernommen hat.

Im Zusammenhang mit der "Bibliography of Succulent Plant Periodicals", deren Publikation auf dem hinteren Umschlag der letzten RPS-Nummer angekündigt wurde, möchte ich mich bei allen RPS-Lesern dafür entschuldigen, dass diese Publikation bisher nicht erschienen ist. Leider war der tschechische Verleger nicht in der Lage, die Bibliographie wie geplant zu veröffentlichen. Die Publikation soll nun aber noch diesen Herbst erscheinen. Leider waren Gründe ausserhalb meiner Einflussmöglichkeiten für die Verzögerung verantwortlich, und für allfällige Unannehmlichkeiten möchte ich mich entschuldigen.

Urs Egli

Dank

Wie schon in früheren Jahren haben Reto Nyffeler (Zürich) und Joachim Thiede (Köln) den Herausgeber mit wichtigen Literaturhinweisen und Kopien unterstützt, wofür ihnen hier herzlich gedankt wird. Ein Wort des Dankes geht auch an Nigel Taylor (Kew), der sich trotz der Belastung seiner neuen Tätigkeit in Kew verschiedener nomenklatorischen Probleme angenommen hat.
