A short history of *Repertorium Plantarum Succulentarum*

The first issue of *Repertorium Plantarum Succulentarum* (RPS) was produced in 1951 by Michael Roan (1909–2003), one of the founder members of the International Organization for Succulent Plant Study (IOS) in 1950. It listed the ‘majority of the new names [of succulent plants] published the previous year’. The first issue, edited by Roan himself with the help of A. J. A. Uitewaal (1899–1963), was published for IOS by the National Cactus & Succulent Society, and the next four (with Gordon Rowley as Associate and later Joint Editor) by Roan’s newly formed British Section of the IOS. For issues 5–12, Gordon Rowley became the sole editor. Issue 6 was published by IOS with assistance by the Acclimatisation Garden Pinya de Rosa, Costa Brava, Spain, owned by Fernando Riviere de Caralt (1904–1992), another founder member of IOS.

In 1957, an arrangement for closer cooperation with the International Association of Plant Taxonomy (IAPT) was reached, and RPS issues 7–22 were published in their *Regnum Vegetabile* series with the financial support of the International Union of Biological Sciences (IUBS). Issues 23–25 were published by Abbey Garden Press of Pasadena, California, USA, after which IOS finally resumed full responsibility as publisher with issue 26 (for 1975).

Gordon Rowley retired as editor after the publication of issue 32 (for 1981) along with Len E. Newton, who had assisted him with issues 13 onwards. Starting with issue 33, RPS was compiled and edited by Urs Eggli and Nigel Taylor, who enhanced it by adding data on nomenclatural types and enlarging the ‘Bibliographia’ section, first introduced in issue 20 (for 1969). After issue 45 (for 1994), Nigel Taylor handed over as co-editor to his wife Daniela Zappi, who assisted with issues 46–59. Reto Nyffeler joined the editorial team for issues 55–65.

Starting in 1986, a nomenclatural and bibliographical database was created at the Zürich Succulent Plant Collection to compile the individual issues. Over the years all earlier issues were added to this database, making it possible to produce the ‘IOS Index of Names of Cactaceae published 1950–1990’. This was published by the Royal Botanic Gardens Kew in 1991, and followed by an equivalent list for the ‘other succulents’ in 1994.

After 60 issues conventionally printed, *Repertorium Plantarum Succulentarum* has been made available in digital form in pdf format (‘portable document format’) from issue 61 onwards, as an ‘open access’ publication under a Creative Commons licence, accessible over the internet (e.g. <http://succulentresearch.org/publications/>). In 2024, all issues of RPS were digitized and are now available in the Bibliothèque numérique du Cactus Francophone (<https://www.cactuspro.com/biblio/en:rpsbis>).

Conventions used in Repertorium Plantarum Succulentarum

- Repertorium Plantarum Succulentarum attempts to list, under separate headings, newly published names of succulent plants and relevant literature on the systematics of these plants, on an annual basis. New names noted after the issue for the relevant year has gone to press are included in later issues. Specialist periodical literature is scanned in full (as available at the library at ZSS or received by the compiler). Also included is information supplied to the compiler direct.
- Validly published names are given in **bold face** type (except for epithets of new cultivars), accompanied, in the case of newly described taxa, by an indication of the nomenclatural type (name or specimen dependent on rank), followed by the herbarium acronyms of the herbaria where the holotype and isotypes are said to be deposited (first acronym for holotype), according to the Index Herbariorum database. Invalid, illegitimate, or incorrect names are given in *italic* type face. In either case a full bibliographic reference is given. For new combinations and replacement names, the basionym or replaced name is listed. For invalid, illegitimate or incorrect names, the articles of the ICBN/ICN or ICNCP which have been contravened are indicated in brackets. For names before 2012, the articles cited are those of the ICBN (Vienna Code, 2006), while the ICN (Melbourne Code, 2012, and Shenzhen Code, 2018) is used for newer names.
- The compiler would like to point out that he does not accept any names that might be inadvertently validated in this volume of RPS.
- Bibliographic details of papers dealing only with the names of one or few new taxa are usually not repeated in the bibliographic section.
- Starting with RPS 61, abbreviations for periodicals are those suggested in Bibliographia Periodicorum Huntianum Ed. 2 (BPH2), or are constructed according to BPH2 guidelines for other periodicals. For some titles where BPH2 has incomplete data, the abbreviations suggested in the ‘Bibliography of Succulent Plant Periodicals’ (U. Eggli in Friciana 60: 1-139, 1998 (‘1995’)) are used.

Compilers' Preface

Finally, the RPS volume covering the year 2021 has become a reality. Rather than accelerating the compilation of RPS, we have fallen even more behind schedule. As explained in the preface to the preceding RPS volume, one of the reasons for this is a new database environment we have been installing at the end of 2023. Migration of our data to the new BRAHMS database has now been successfully completed, and all daily operations are now performed with this powerful database environment.

The change in database also brought about a change in the way publications such as RPS are produced, i.e. how data is extracted from the database and formatted according to the desired layout. You will notice that as a result of the new workflow, a number of small enhancements to RPS contents have been made (such as adding information on type locality nation and major administrative unit), alongside with a number of minor typographical changes. The overall layout and structuring of the information has been conserved, however.

The production of the present volume of RPS would not have been possible without the help of Emmanuel Wyss, science assistant at the Zürich Succulent Collection, who has meticulously added most of the bibliography details into the database. Numerous colleagues from all over the world have greatly helped by supplying pdf versions of their works.

Rumicastrum nanum Carolin e x Hershkovitz, EcoEvoRxiv g6s3a: 5, 2021. Basionym: *Talinum nanum*. *Nom. inval.* (ICN Art. 29.1, 30.2?). [E-published as preprint, but without ISSN or ISBN.]

OXALIDACEAE

Oxalis mollendoensis J. M. H. Shaw, Cactus-World 39(1): 71, 2021. Typus: Johnston 6291: Peru, Arequipa (GH). [*Nom. nov. pro Oxalis carnosa* var. *hirta* R. Knuth 1930.]

PIPERACEAE

Peperomia ostolazae Pino & Samain, Quepo 35: 25-28, ills. (pp. 21-39), 2021. Typus: Ostolaza 991372: Peru: Apurímac (USM 325360).

Peperomia renzopalmae Pino & Ric. Fernández, Haseltonia 27: 123-125, ills., 2021. Typus: Palma s.n. in Fernández & Pino 252: Peru, Piura (USM). [Dated 28. 12. 2020 on the inside front cover, but publication date given as 1. 3. 2021 in the digital version on BioOne.]

Peperomia ricardofernandezii Pino & Samain, Haseltonia 27: 126-128, ills., 2021. Typus: Pino & Fernández 3153: Peru, Piura (USM). [Dated 28. 12. 2020 on the inside front cover, but publication date given as 1. 3. 2021 in the digital version on BioOne.]

PORFULACACEAE

Portulaca avinoamii García-Beltrán, Brittonia 73: 300, 2021. Typus: Klug 1214: Peru, Loreto (US). *Nom. illeg.* (ICN Art. 52.1). [*Nom. nov. illeg. pro Portulaca tuberculata* (Danin & H. G. Baker) Danin 2006 (*non P. tuberculata* León 1950); *P. daninii* Galasso & al. 2011 has priority.]

Portulaca oleracea var. *trituberculata* (Danin & al.) J.-M. Tison, Evaxiana 8: 224, 2021. Basionym: *Portulaca trituberculata*.

Portulaca waterbergensis Peckover, Cactus-World 39(4): 328, ills. (pp. 327-328, 330), 2021. Typus: Peckover 305: RSA, Limpopo (PRU).

RUSCACEAE

Dracaena ascendens var. *bhwirei* (R. H. Webb & L. E. Newton) Takawira-Nyenya & Thiede, Phytotaxa 524(4): 294, 2021. Basionym: *Sansevieria ascendens* var. *bhwirei*.

Dracaena brevifolia (L. E. Newton) Takawira-Nyenya & Thiede, Phytotaxa 524(4): 294, 2021. Basionym: *Sansevieria brevifolia*.

Dracaena coleana (T. G. Forrest) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 294, 2021. Basionym: *Sansevieria coleana*.

Dracaena conduplicata (T. C. Cole & T. G. Forrest) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 294, 2021. Basionym: *Sansevieria conduplicata*.

Dracaena enchloridiofolia (R. H. Webb & L. E. Newton) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 294, 2021. Basionym: *Sansevieria enchloridiofolia*.

Dracaena forestii (L. E. Newton & R. H. Webb) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 294, 2021. Basionym: *Sansevieria forestii*.

Dracaena marachiensis (T. G. Forrest) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 295, 2021. Basionym: *Sansevieria marachiensis*.

Dracaena pfennigii (Mbugua) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 295, 2021. Basionym: *Sansevieria pfennigii*.

Dracaena pinguicula fa. **disticha** (Pfennig ex A. Butler) Takawira-Nyanya & Thiede, Phytotaxa 254(4): 296, 2021. Basionym: *Sansevieria pinguicula* ssp. *disticha*. [Repeated by L. E. Newton, Sansevieria 47: 12, 2022.]

Dracaena rugosifolia (R. H. Webb & L. E. Newton) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 295, 2021. Basionym: *Sansevieria rugosifolia*.

Dracaena spathulata ssp. **sudwallensis** (R. H. Webb) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 295, 2021. Basionym: *Sansevieria concinna* ssp. *sudwallensis*.

Dracaena suffruticosassp. longituba (Pfennig) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 296, 2021. Basionym: *Sansevieria suffruticosa* var. *longituba*.

Dracaena trifasciata ssp. **sikawae** (R. H. Webb & Singer) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 295, 2021. Basionym: *Sansevieria trifasciata* ssp. *sikawae*.

Dracaena vanillosa (M. Burkart & Scharf) Takawira-Nyanya & Thiede, Phytotaxa 524(4): 296, 2021. Basionym: *Sansevieria vanillosa*.

Sansevieria marachiensis T. G. Forrest, Cact. Succ. J. (US) 92(3): 208, illus. (pp. 207, 209), 2021. Typus: Forrest 1515: Uganda, Maracha Distr. (MHU).

Sansevieria vanillosa M. Burkart & Scharf, Sansevieria Online 9(1: Article 4): 5, illus. (pp. 2-4), 2021. Typus: Pfennig 1192: Tanzania: Lindi Region (B 10 0482576).
